ZACH WINSHIP

Jersey City, NJ ◇ (207) 831-6867 ◇ zachtwinship@gmail.com ◇ zwinship.github.io ◇ linkedin.com/in/zwinship

EDUCATION

New York University — Expected May 2027
MS in Quantitative Economics — *Economics Teaching Fellowship*

Bentley University, Waltham, MA — May 2026
BS in Quantitative Economics, GPA: 3.74 — *Minors: Mathematics, Data Technologies*

- President's or Dean's List every semester; 3.92 GPA over final 60 credits.
- Coursework: Applied Econometrics, Time Series Analysis, Real Analysis, Mathematical Statistics, Policy Evaluation Modeling, Data Science, Database Management (SQL), Linear Algebra.

RESEARCH

Congestion Pricing and EMS Response Time: Evidence from New York City — NBER WP No. 35414
With Chikish, Colman, Dave, Humphreys, and Santamaria — *Under journal review*

- Led all data construction and empirical analysis (all code, tables, and figures). Estimated that Manhattan's January 2025 congestion toll cut ambulance travel times by about 63–70 seconds (5–6%).
- Covered by Fortune, ABC7 New York, Gothamist, Streetsblog NYC, and Yahoo Finance. nber.org/papers/w35414

Traffic, Transit, and the Toll: Causal Evidence from NYC's Congestion Pricing — Spring 2026

- Senior capstone (advisor: Dhaval Dave). Difference-in-discontinuities at the 60th Street boundary using traffic-camera and MTA data: passenger vehicles fell 20.6% and trucks 18.1%, while pedestrians rose 13.5% and bicycles 19.8%.

The Real Price of Clean Air: EPA Ozone Regulation — 2025

- Regression discontinuity at the EPA ozone attainment threshold; estimated a $277M annual revenue impact on manufacturers.

EXPERIENCE

New York University — Sep 2026 – Present
Research Assistant to Prof. Anna Vitali, Department of Economics — *New York, NY*

- Maintain the Stata cleaning pipeline for a Uganda firm survey: high-frequency data checks, variable construction, survey preloads, and name matching.
- Cleaned and analyzed a listing exercise covering about 30 Kampala markets (maps, per-market statistics, summary tables).

New York University — Aug 2026 – Present
Teaching Assistant, Introductory Macroeconomics — *New York, NY*

- Lead two recitation sections (90 students total) for Prof. Catovic; proctor and grade exams; manage grade entry.

Bentley University — Summer 2026
Instructional Content Assistant (Prof. Naveen Sunder) — *Waltham, MA*

- Building a 12-week interactive Intermediate Microeconomics platform with visualizations, practice problems, and flashcards (HTML, JavaScript). falconeconsim.github.io
- Built "Ask the Course AI," a retrieval-augmented (RAG) chatbot that answers student questions from course materials.

Bentley University — May – Dec 2025
Research Assistant, Department of Economics (Prof. Savannah Adkins) — *Waltham, MA*

- Wrote Python scrapers to compile a dataset of ASSA conference sessions; analyzed geographic coverage, representation, and socioeconomic patterns in economics research using Python and Stata.

American Action Forum — Summer 2025
Regulatory Data Intern — *Washington, DC*

- Automated scraping and cleaning of the federal Unified Agenda, letting the team analyze regulatory releases faster.
- Built datasets and dashboards on regulatory activity; wrote literature reviews and published policy analysis.

SELECTED PROJECTS

- **OctaStats UFC Model** (2025–26): dynamic logit fight-outcome model with automated data pipeline and live dashboard.
- **MBTA Ridership Forecasting** (2025): ARIMA models in R to forecast ridership and inform service scheduling.

SKILLS

Programming	Python, R, Stata, SQL, JavaScript/HTML, LaTeX, Git
Methods	Causal inference (RD, DiD, diff-in-disc), time series (ARIMA, VAR/VECM), machine learning, spatial analysis, LLM/RAG
Interests	Transportation and urban economics, policy evaluation, computational economics
